

# Next.js Developer Internship Task

## Design Agency Homepage (Task-Based Evaluation)

---

### 1. Introduction

Thank you for your interest in the Next.js Developer Internship position.

As part of our hiring process, we would like you to complete a task-based assignment to evaluate your:

- Frontend fundamentals
- Component structure
- UI/UX understanding
- Responsiveness
- Code quality

Please read the instructions carefully before starting.

---

### 2. Assignment Overview

You are required to build a **modern Design Agency Home Page** using **Next.js (version 13 or above)**.

App Router is preferred.

The homepage must contain **4 sections**:

1. Hero Section
2. Services Section

3. Portfolio Section

4. Contact Section

The design theme and styling choices are up to you. Creativity is encouraged, but the layout should look professional and clean.

---

## 3. Section Requirements

### 1 Hero Section

- Agency name
  - Short tagline
  - Call-to-action button (e.g., “Get Started” / “View Work”)
  - Background image, illustration, or gradient
- 

### 2 Services Section

- 3–4 service cards
- Each card must include:
  - Icon or image
  - Service title
  - Short description

Example services:

- UI/UX Design
- Web Development

- Branding
  - Digital Marketing
- 

### **3 Portfolio Section**

- Grid layout displaying 3–6 projects
  - Each project must include:
    - Image thumbnail
    - Project title
  - Optional: Hover effects or animations
- 

### **4 Contact Section**

- Name input field
- Email input field
- Message textarea
- Submit button

Optional:

- Basic validation
  - Success message
- 

## **4. Technical Requirements**

- Use **Next.js 13+**
  - Functional components only
  - Separate components for each section
  - Proper folder structure
  - Responsive (mobile-friendly design required)
  - Clean and readable code
  - No heavy pre-built templates
- 

## 5. Bonus (Optional)

The following will be considered a plus:

- Tailwind CSS
  - Basic animations
  - SEO metadata implementation
  - Dark mode toggle
  - Image optimization using Next/Image
- 

## 6. Submission Requirements

Please submit:

- GitHub repository link
- Live deployment link (Vercel preferred)
- README file including:

- Setup instructions
  - Tech stack used
  - Any assumptions or additional features
- 

## 7. Timeline

Please complete and submit the assignment within **2–3 days** of receiving it.

If you require additional time, inform us in advance.

---

## 8. Evaluation Criteria

Your submission will be evaluated based on:

- UI quality and design sense
- Responsiveness
- Component structure and reusability
- Clean code practices
- Performance considerations
- Creativity

Shortlisted candidates will be invited for a technical discussion to explain their implementation and decisions.

---

## 9. Important Notes

- Do not copy templates.
- Keep the implementation simple but clean.
- You can use AI
- Focus on structure and clarity over unnecessary complexity.

**We look forward to reviewing your submission.**
